# ONE COOK NEEDED TO COMPLETE UNIT

---

## Formation of Base Hospital Easy Until Ninth Chef Is Reached.

---

Mobilizing base hospitals to care for 500 or 1000 sick or wounded men at the front would be comparatively easy if it were not for the scarcity of cooks. Base Hospital No. 6, organized by the Massachusetts General Hospital, is under mobilization orders for duty. The intricate task of picking 25 doctors, 65 nurses and 153 orderlies, privates, electricians, barbers, tailors, a head chef and seven able assistants was carried through smoothly as far as the ninth cook.

The organizers of the unit are frankly puzzled at their inability to supply this one missing link, which is holding up an otherwise complete outfit. Somewhere in the land they believe, there must be a ninth cook. The requirements are simple. He may be anywhere between the ages of 21 and 45 years old, and provided he can cook, he will make the unit complete.
